

Xpedition

INNER CIRCLE
FOR MICROSOFT BUSINESS APPLICATIONS

Become future-ready with Xpedition

The disruptive pace of AI innovation means the need for retailers to accelerate digital transformation and data modernisation is more vital than ever.

As a strategic Microsoft Partner and member of Microsoft's prestigious Inner Circle, Xpedition's Data & AI expert team has extensive experience delivering business value-focused Data & AI consultancy and implementation services for the retail sector.

Powered by Metis for Retail, Xpedition can transform your data estate to enable rapid, accurate and trusted decision making. Leveraging Microsoft Fabric and the Microsoft Intelligent Data Platform, combined with Microsoft Dynamics 365, and the Microsoft Power Platform, Xpedition powers progress through the intelligent application and adoption of next-gen AI across all core business functions.

Whether it's radically improving the employee experience, driving a culture of innovation, increasing productivity and capability through actionable insights, or delivering exceptional customer experiences, Xpedition will work with you to design a comprehensive data transformation roadmap, and implement the latest AI solutions so you can be sure your organisation is future-ready.

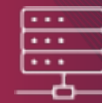

To learn more about how Xpedition can unlock your firm's true potential and maximise your competitive advantage with AI, contact an expert today.
