

Start Your Journey....

Choose how you start your Quest for Business Excellence

1. Copilot START Engagement

Xpedition's Copilot START Engagement is a free, half-day workshop designed to help organisations explore the potential of Microsoft Copilot and generative AI. Led by a Senior Xpedition AI Specialist, this complimentary workshop demonstrates how organisations can strategically adopt AI for maximum impact.

Copilot START includes:

- An inspiring showcase of Copilot's capabilities and a collaborative design-thinking workshop.
- Customised and set around your key business challenges identified within your specific functional scenarios and maps out tailored AI-driven solutions.
- Following the session, participants receive a customised AI blueprint outlining specific use cases, prioritised initiatives, and actionable next steps to unlock efficiency and drive growth.

The Quest for Business Excellence

Microsoft

Your AI Transformation Journey

Calling business leaders

As a business leader, embarking on your quest for business excellence you are driven by a desire to grow and transform your organisation amidst a challenging and evolving marketplace.

Your mindset is one of determination and innovation; you are not just seeking solutions but are on a mission to discover the tools that will propel your business forward.

The Power of Microsoft Copilot

Let us show you the power of Microsoft Copilot, your UI for AI. A personal assistant, grounded in work content like emails, meetings and documents and critical business data. Every employee will have a Copilot and it will help you interact with AI Agents.

The Path to Operational Excellence

To maintain smooth business operations, it's crucial that processes in key areas such as finance, procurement, and supply chain are optimised to minimise cost, mitigate risks, and accelerate decisions.

Our experts can share the power of autonomous agents delivered in Microsoft Dynamics 365 Business Central and those we build for you. Here are some examples:

The Microsoft Sales Order Agent

This AI Agent operates in Microsoft Dynamics 365 Business Central and is all about improving the order experience and accelerating delivery for customers, enabling sales teams to focus on growing the business.

The Vendor Onboarding Agent

The Xpedition built Vendor Onboarding Agent automates repetitive tasks, allowing vendors to self-serve via your website, creating a better vendor experience and freeing up your Finance and Procurement teams to focus on more important tasks.

Choose your next Steps

Turnover to Start your Quest...

Identify your challenges

Whether you find yourself entangled in a quagmire of manual processes, yearning to break free from siloed systems, or striving to accelerate your sales cycle, the power of AI is the key to scaling operational efficiency and elevating your customer experience.

Designing your path to success

Your guide acts as a partner on your quest, unleashing the power of AI such as Microsoft Copilot and Agents, identifying exciting opportunities, designing your roadmap and navigating the pitfalls and challenges along the way.

Xpedition is here to partner with forward-thinking leaders like you. Our team of expert navigators will help you chart your path to success.

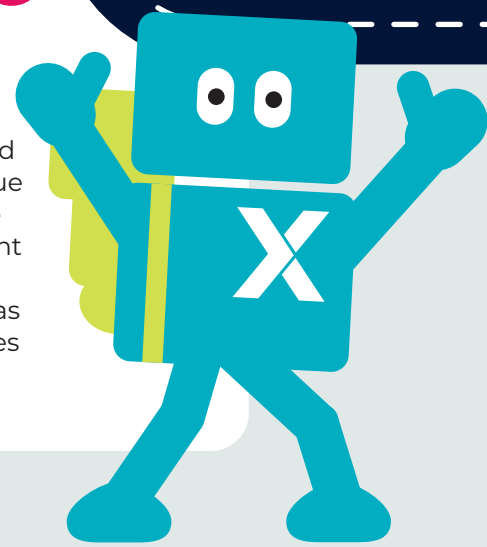

Introducing AI Agents

AI Agents vary in levels of complexity and capability depending on your need. They automate and execute business processes working on your behalf or alongside your team. There are many different agents, as every business process will have one.

Xpedition can build agents for you, or build them with you, always tailored to your needs and created to drive your business forward.

Seeking your Guide

Setting out on this transformation journey can be daunting, requiring a solid plan aligned with your unique business challenges and the expertise to leverage the right tools and solutions. You will need a trusted guide who has undertaken many adventures with successful tales to tell.

The Path To Commercial Excellence

Microsoft Agents drive improvements in sales, customer service, marketing, and experience to streamline operations and enhance customer engagement.

The Sales Agent – your new sales team member

The Microsoft Sales Agent autonomously manages leads, researches prospects, schedules meetings, and accelerates deal acquisitions using CRM data to drive sales. Microsoft Sales Chat offers insights from CRM data, emails, pitch decks, and meetings to speed up the sales cycle. Integrated with Microsoft Dynamics 365 and third-party CRMs, it enables sellers to nurture deals without switching between systems.

Customer Service Agents – for self and human-assisted service

Microsoft AI agents help customer service teams handle routine queries, deflect cases, and escalate complex issues to human representatives with full context. The Customer Intent and Customer Knowledge Management Agents, available for Microsoft Dynamics 365 Customer Service and Contact Center, transforms both self-service and human assisted customer experiences.
